MAIN MANUSCRIPT, June 12th (JMIR #21388 pre-print)	
SARS-CoV-2 Biology Suggests We Should Protect Our Young Population Laura Lafon-Hughes [1]* and Deborah J. Keszenman [2]	https://preprints.jmir.org/preprint/21388, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21388-submitted.pdf.
SPLITTED MANUSCRIPT, June 19th	
SARS-CoV-2 Biology Insights, **Part I. Genome-wide structure and druggability: literature review**	https://preprints.jmir.org/preprint/21593, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21593-submitted.pdf.
SARS-CoV-2 Biology Insights, **Part II. COVID-19 as a systemic persistent infection: narrative review.**	https://preprints.jmir.org/preprint/21595, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21595-submitted.pdf.
SARS-CoV-2 Biology Insights, **Part III. The COVID-19 latency hypotheses and the fertility question.**	https://preprints.jmir.org/preprint/21596, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21596-submitted.pdf.
SARS-CoV-2 Biology Insights, **Part IV: Antibody-Dependent Enhancement (ADE) and the tricky "Herd Immunity".**	https://preprints.jmir.org/preprint/21599, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21599-submitted.pdf.
SARS-CoV-2 Biology Insights, **Part V. Protect Our Young Population From COVID-19: Viewpoint**	https://preprints.jmir.org/preprint/21601, https://s3.ca-central-1.amazonaws.com/assets.jmir.org/assets/preprints/preprint-21601-submitted.pdf.

The manuscript above has been sent to **Journal of Medical Internet Research (JMIR) to be open accessed as a pre-print** and evaluated under an open-peer review scheme by interested scientific researchers. There has been some issue with indexing by GoogleScholar. Therefore, the manuscript cannot be found through keywords. In other words, it is not being shared. We received no support from JMIR (because indexing is not their bussiness) nor from Google Scholar (probably due to overwork). Therefore, we decided to do the following attemps to open the Access to the manuscript:

1) Using Researchgate, Figshare, cvuy-ANII webpage, university webpage, etc, share the link to the preprint webpage together with the title

2) Split it into five smaller thematic manuscripts, upload them and share the links too.
